WEBSITE GUIDE FOR COMPANIES IN SAUDI ARABIA

An Arabic company website that *wins tenders, suppliers and talent*

A ready-made corporate website for a Saudi engineering, industrial or services company, in Arabic and right-to-left first, with a full English version one click away. Sector slider, projects map, downloadable company profile, ISO certificates, a request-for-quotation wizard, vendor registration, careers with a Saudisation note and an investors page are all included. We adapt it to your company, host it and keep it updated.

Ready Site · Corporate Website package

Live preview: sharika.pentaservices.co.uk

CONTENTS

What's *in this guide*

1 · At a glance	3

11 · Investors, news and contact	13
12 · Arabic, English and Saudi details	14
13 · Designed for the phone	15
14 · Your brand, Google and AI search	16
15 · All included and price	17
16 · How we start	18
17 · Next steps	19

TRY THE LIVE DEMO

sharika.pentaservices.co.uk

Jalmad Group (مجموعة جلمد) is a fictional Saudi engineering and industrial services group. Every name, project, figure, certificate, person and registration number in the demo is a sample that we replace with your own. The Saudi facts shown (VAT number format, the Personal Data Protection Law, Etimad for government tenders, the Nitaqat programme and ZATCA e-invoicing) were checked in November 2026.

Built for how *Saudi companies are judged*

Before a client invites you to tender, a procurement team checks who you are, where you've worked, which certificates you hold and whether you meet Saudisation and local content rules. Suppliers want to register, engineers want to apply, and investors and lenders want to see governance. This website answers each of them in Arabic and English, and sends each one to the right next step.

What visitors check first

- Who the company is, how long it has worked in the Kingdom, and in which sectors
- Real projects in their city or sector, with results
- ISO certificates, safety record and Saudisation
- How to send a request for quotation or tender invitation
- How suppliers register and how candidates apply

What the website gives them

- A sector slider and numbered company-profile sections on the homepage
- A projects map of the Kingdom with sector, status and year filters
- A company profile they can download, or build section by section as a PDF
- A certificate checker, a three-step RFQ and a four-step vendor registration
- Careers, an investors page, news, and a full English version

Ready pages in Arabic, plus 21 in English

Interactive tools, from the projects map to the vendor wizard

Downloadable company profiles, Arabic and English

Tap from any page to request a quotation

Who it suits

- Engineering and contracting companies
- Industrial and maintenance services
- Energy, water and utilities contractors
- Facilities management companies
- Holding and investment groups
- Consultancies bidding for government work

A company profile *told in eight numbered sections*

The homepage reads like a printed company profile, but it moves. Each section has a large outlined number and answers one question a client or committee asks.

1. **Sector star slider**
   Five sectors, each with its own photo inside an eight-point star, a headline, a key figure and two calls to action: request a quote or download the profile.
2. **Key figures**
   Years in the Kingdom, staff, Saudisation rate and cities, counting up as they appear.
3. **01 Who we are**
   An answer-first paragraph, octagon-framed photos and a short timeline.
4. **02 Sectors**
   Tabs for each sector with photo, description and three KPIs.
5. **03 Projects map**
   The full interactive map of the Kingdom, right on the homepage.
6. **04–06 Quality, impact, governance**
   ISO certificates and safety numbers, Vision 2030 alignment in figures, and a financial chart.
7. **07–08 Profile and partners**
   Profile downloads, then three doors: clients, suppliers and talent. News and FAQ close the page.

WHY IT WORKS

Procurement teams scan for proof. Numbered sections, published figures and a one-click quotation request give them what they need without a phone call, so your company makes the shortlist.

The sector star: *your company at a glance*

The slider is built around an eight-point star, a shape rooted in Islamic geometric design. Each sector's photo sits inside it, ringed by numbered sector buttons and a progress line.

01 Renewable energy, with 1.4 GW under operation

02 Industrial services and safe shutdowns

03 Water and desalination

04 Power grids and substations

05 Facilities and smart cities

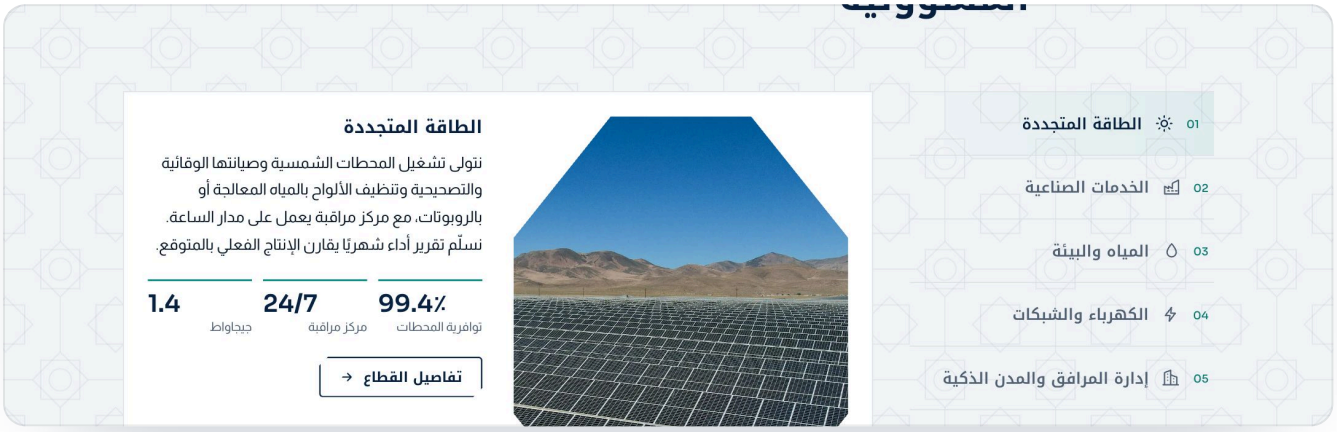

1. **Pick a sector on the star**
   Five numbered buttons around the ring change the slide; the active one lights up in teal.
2. **Progress ring**
   A thin line runs round the star while a slide is shown, then the next sector appears.
3. **One figure per sector**
   A white card shows the key number: gigawatts operated, safe hours, cubic metres a day.
4. **Pause, swipe and keys**
   A pause button, swipe on phones, and arrow keys that follow reading direction (left is next in Arabic).
5. **Fast and calm**
   Slide 1's photo loads first; the others wait. With reduced motion, the slider stays still.

DIFFERENT ON PURPOSE

Most corporate sites in the region open with a dark photo and a slogan. The star turns your sectors into the navigation itself, so visitors see what you do before they read a word.

From sector *to the exact service*

Each sector has its own section with photo, description, KPIs and its list of services. The services page arranges 20 services on a grid of sector by asset-life stage: study, build, operate, improve.

Sector tabs on the homepage, each with three KPIs

Service finder: sector by asset-life stage, with Arabic-aware search

Chosen services go straight into the quotation request

1 Filter and search
Filter by sector or type a word; the search understands Arabic letter variants.

2 Add to request
Tap services to add them; a bar keeps count and pre-fills the RFQ.

3 Links between pages
Each sector links to its services and its projects on the map.

5 · PROJECTS MAP

Your projects *on the map of the Kingdom*

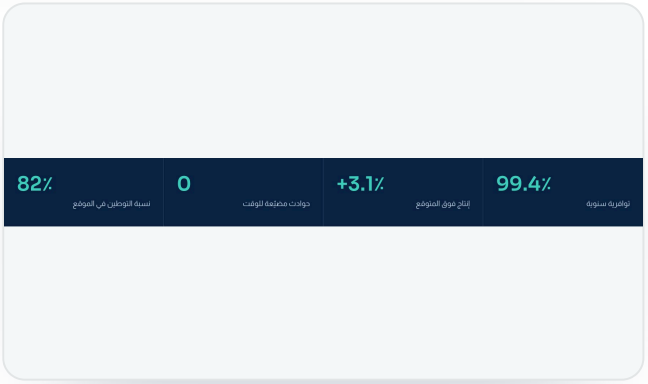

A map of Saudi Arabia with a pin for every city where you work. The number on each pin changes as visitors filter by sector, status and year.

Energy filter: only matching cities stay bright, and the list updates

Tap a city to see its projects

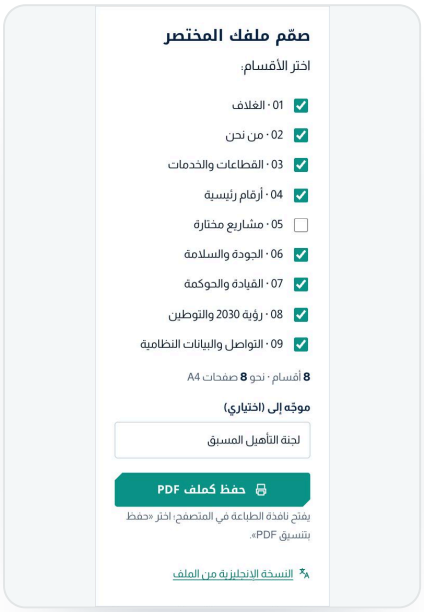

Case study results, shown as four clear figures

1. **Sector, status, year**
   Completed, in progress or long-term operation, from a chosen year.
2. **Map and list together**
   Hovering a project lights up its city; client names can stay confidential.
3. **Case studies**
   Challenge, three steps and four results for your flagship projects, in both languages.

A company profile PDF *the website writes for you*

Every tender asks for a company profile. Here it is generated from the website's own content, in Arabic and English, so it is never out of date.

Choose sections and who it is for

The profile cover, ready to print

Key figures and financial highlights

Homepage band with both PDFs and the profile builder

1. **Two ready PDFs**
   A full profile in Arabic and one in English, 9 A4 pages each, to download.

2. **Build your own**
   Untick sections, add "Prepared for: prequalification committee" and save as PDF.

3. **Always current**
   Projects, figures, certificates and leadership come from the same data as the site.

SAVES DAYS PER TENDER

Bid teams usually rebuild the profile in a design tool for each tender. With this site, they pick the sections the committee wants and save a clean PDF in a minute.

Certificates *visitors can verify*

ISO management systems are shown as badges with their scope, and a checker confirms a certificate number. Safety indicators are published, including subcontractors.

Six ISO badges (labelled examples on the demo)

Certificate checker: enter the number, see the standard and expiry

Safety numbers: incident rate, safe hours, training, pre-qualified subcontractors

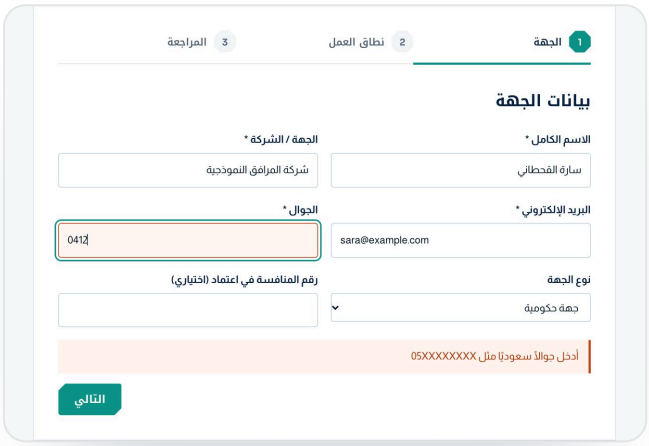

1. **Your real certificates**
   We list your actual standards, numbers and expiry dates, and link to the certification body if you like.

2. **Safety record**
   Rate of recordable incidents, safe hours and training, updated each quarter.

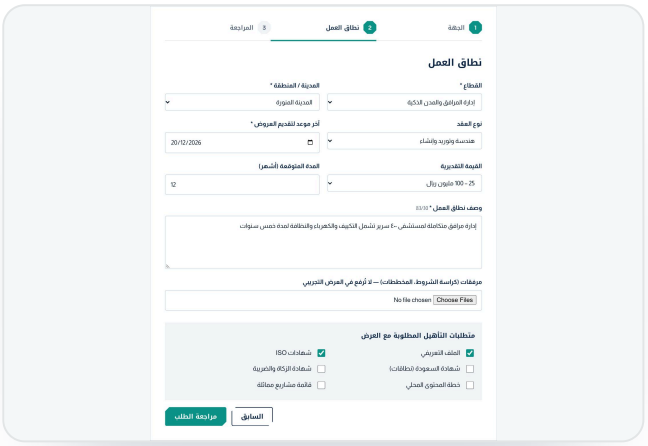

3. **How you work**
   Permits to work, stop-work authority and audits, in plain language.

A request for quotation *in three steps*

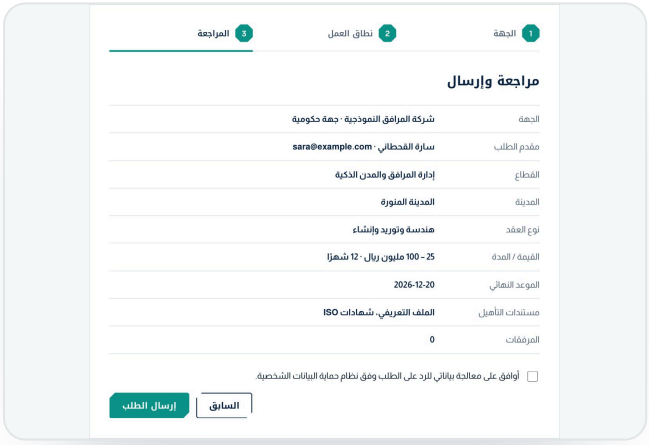

Government tenders go through the Etimad platform. For everything else, clients send a structured RFQ that your bid team can act on at once.

Step 1: organisation, checked Saudi mobile number and optional Etimad tender number

Step 2: sector, city, contract type, deadline, value, scope and attachments

Step 3: review of every answer before sending

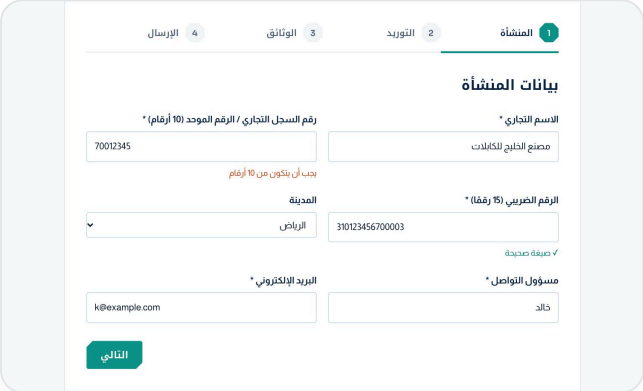

An instant reference number, and priority if the deadline is close

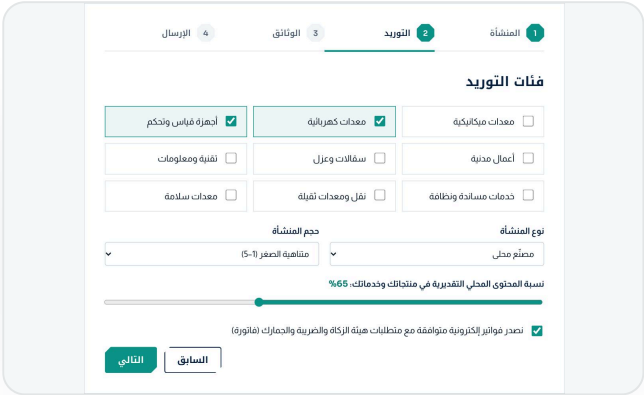

1. **Checks that save calls**
   Saudi mobile format, a future deadline and a real scope description are required.
2. **Prequalification list**
   The client ticks what they need with the bid: profile, ISO, Nitaqat, Zakat, local content plan.
3. **To your team**
   Requests go to your tenders inbox or CRM with a reference number like RFQ-2026-4821.

A supplier portal *that checks Saudi details as you type*

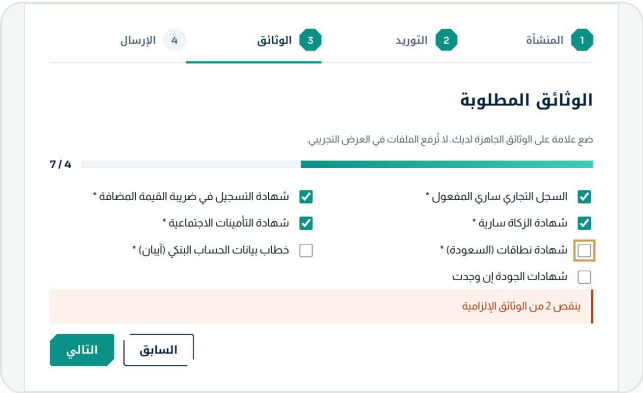

Suppliers and subcontractors register in four steps, and procurement receives a complete, checked application.

Step 1: commercial registration (10 digits) and VAT number (15 digits, starting and ending with 3), checked live

Step 2: supply categories, business type, size, local content slider and e-invoicing

Step 3: document checklist with progress meter

Step 4: summary and code of conduct

1 Saudi formats
CR or unified number and VAT number are checked before the supplier can continue.

2 Local content
Suppliers state their local content and whether they issue ZATCA-compliant e-invoices.

3 Mandatory documents
CR, VAT, Zakat, GOSI, Nitaqat and bank letter must be ready before submitting.

BETTER SUPPLIERS, LESS ADMIN

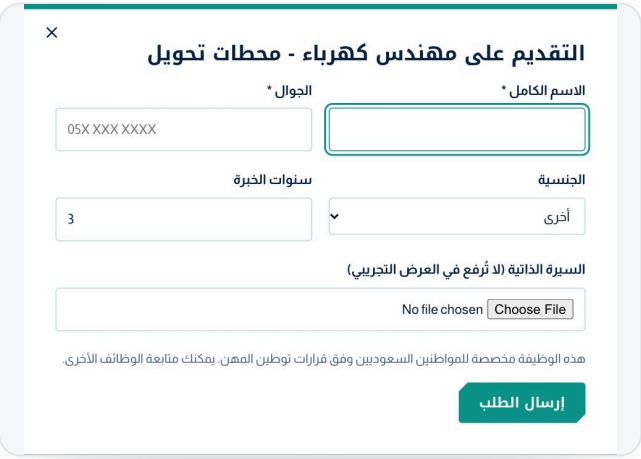

Local content and SME preference are part of how Saudi companies are assessed. A clear portal brings you more local suppliers, already sorted by category, with their documents ready.

Jobs, a graduate programme *and a clear Saudisation note*

Job listings with filters, a short application form and an honest note on how the company meets Saudisation rules.

Job list with search and filters for city, sector and type; roles for Saudi nationals are tagged

Apply in a pop-up; a role reserved for Saudi nationals explains why

Saudisation section: the Nitaqat programme, Qiwa contracts and figures

1. **Filters**
   City, sector and contract type, plus search by job title.
2. **Saudisation, explained**
   Roles reserved for Saudi nationals under profession localisation rules are labelled and explained.
3. **Job schema**
   Every role is marked up as a JobPosting so it can appear in Google's job search.

Governance, news *and the right inbox*

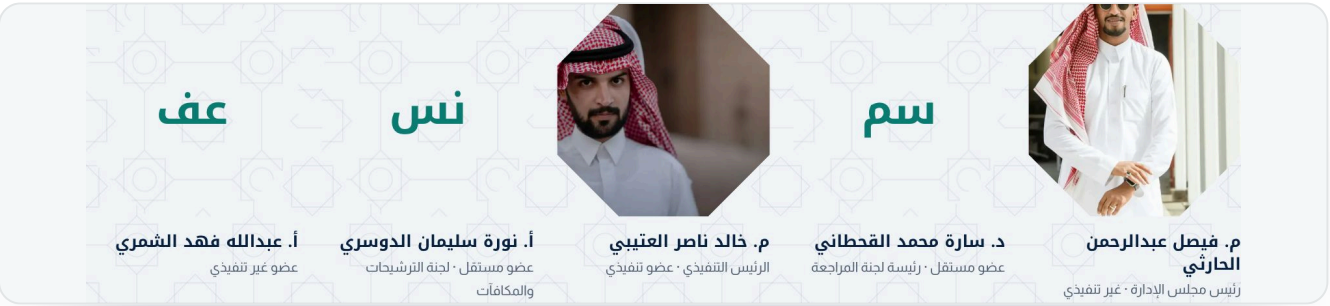

An investors page for shareholders and lenders, a newsroom and a contact form that routes each message to the right department.

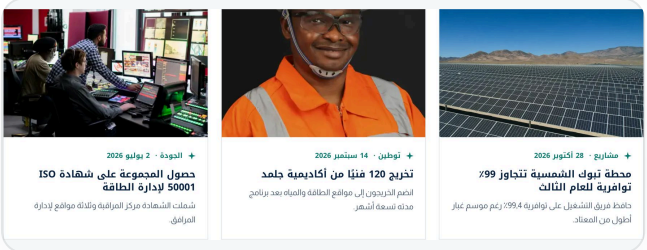

Five-year chart: revenue, backlog or Saudisation (sample figures)

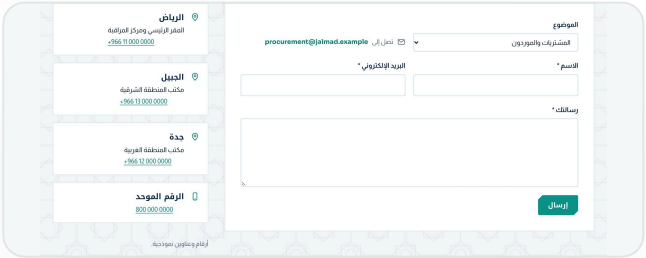

Annual report, financial statements, governance code and policies

Board of directors with independent members and committees

News with categories

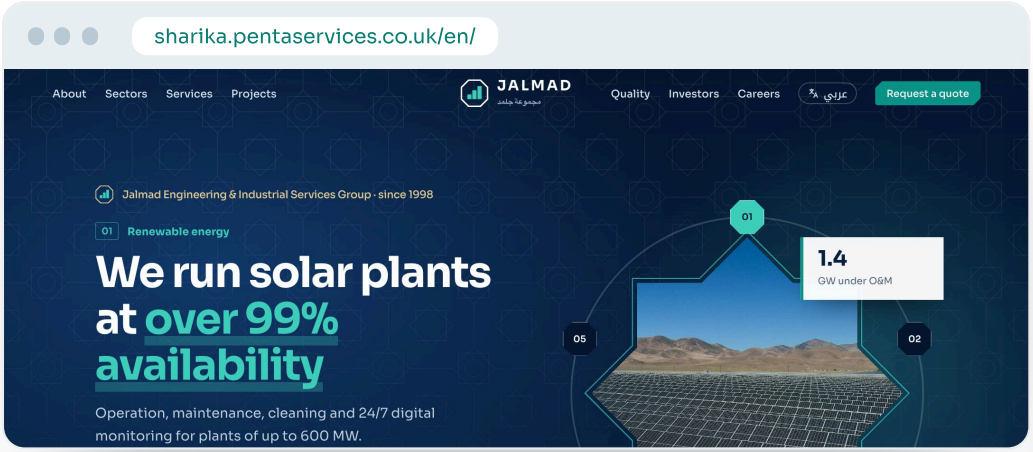

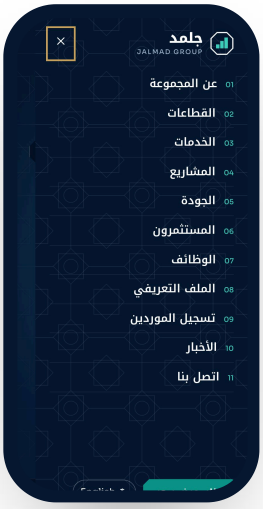

Contact form that shows which department will receive the message

1. **Board and committees**
   Members, roles and committees, in line with the Companies Law.
2. **Documents and calendar**
   Reports and policies to download, and upcoming board and general assembly dates.
3. **Routed contact**
   Tenders, procurement, HR, investor relations, media or general enquiries.

Arabic first, *English one click away*

Arabic is the main version, right-to-left from the first pixel, with a complete English version at /en/. Every page links to its twin.

The menu opens from the right in Arabic

True RTL and LTR

Layouts, arrows, slider keys, drawer and forms follow the reading direction of each language.

Language switch

The switch on every page opens the same page in the other language, with hreflang for Google.

One digit style

Western digits throughout, so figures and dates look consistent in both languages.

Saudi formats

Saudi mobile numbers, CR / unified numbers and VAT numbers are checked in the forms.

Footer details

CR and VAT numbers and legal form in the footer, as Saudi clients expect.

Vision 2030 in words

Alignment shown with your own figures, without the Vision logo or government emblems.

BUILT FOR THE KINGDOM

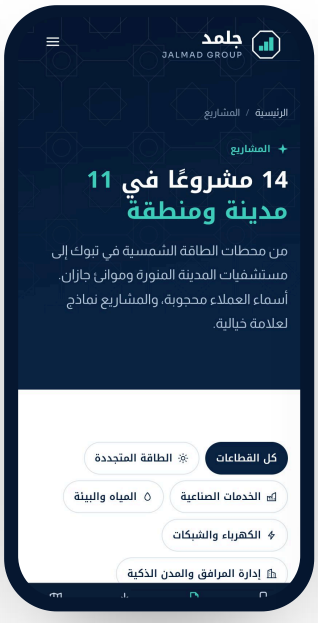

Arabic typography in Noto Kufi Arabic and Almarai, a geometric line pattern inspired by Islamic design, and copy written for Saudi procurement, not translated from a Western template.

Every page *works with one thumb*

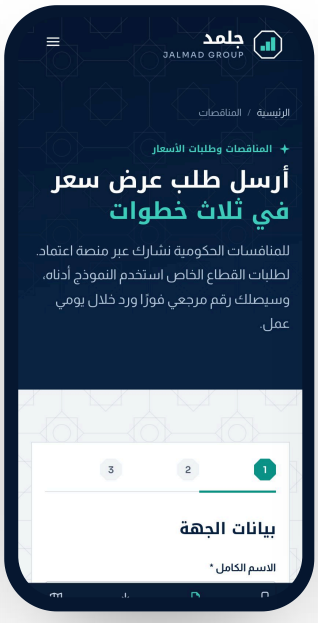

Decision makers open your link on their phones first. A bottom bar keeps call, quotation, profile and projects one tap away.

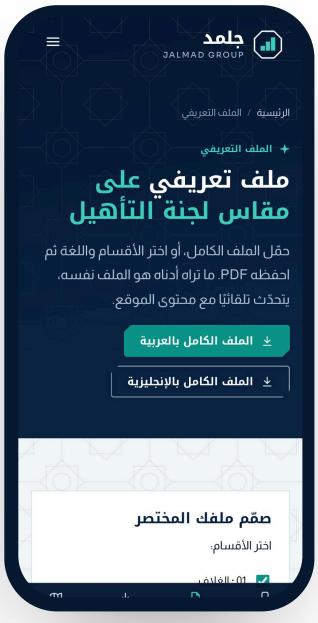

Sector star and headline

Projects map

RFQ wizard

Company profile

Your brand, Google *and AI search*

Navy, teal and sand with an Islamic-inspired line pattern and octagon shapes. We change the logo, colours, fonts, photos and copy to your brand.

Google (SEO)

- Unique title and description on every page, in Arabic and English
- hreflang links between the two languages and a bilingual sitemap
- Organization, JobPosting, NewsArticle, FAQ and breadcrumb structured data
- Fast pages: optimised images, no heavy frameworks

AI search (GEO)

- Answer-first paragraphs on every page
- llms.txt summary of the company and its key pages
- AI crawlers allowed in robots.txt
- Clear, citable facts: founding year, cities, sectors, certificates

Searches the site is built around

corporate website Saudi Arabia | company profile website Arabic

GOOD TO KNOW

We don't guarantee rankings or citations, but we set the site up properly and report progress every month.

15 · ALL INCLUDED

Domain, hosting and email: *we take care of it all*

The website arrives complete and ready to use. You never have to deal with anything technical.

Domain INCLUDED
A free .com, .net or .org domain with yearly billing, or we connect yours.

Fast, secure hosting INCLUDED
Reliable servers, SSL certificate (https) and regular backups.

Business email INCLUDED
Mailboxes on your own domain (e.g. info@yourcompany.sa).

Updates and support
We keep the site updated and secure and make your changes.

Google Business Profile
Your Google Maps listing set up and linked to the website.

Privacy and cookies
Privacy notice under the Saudi Personal Data Protection Law, and cookie consent.

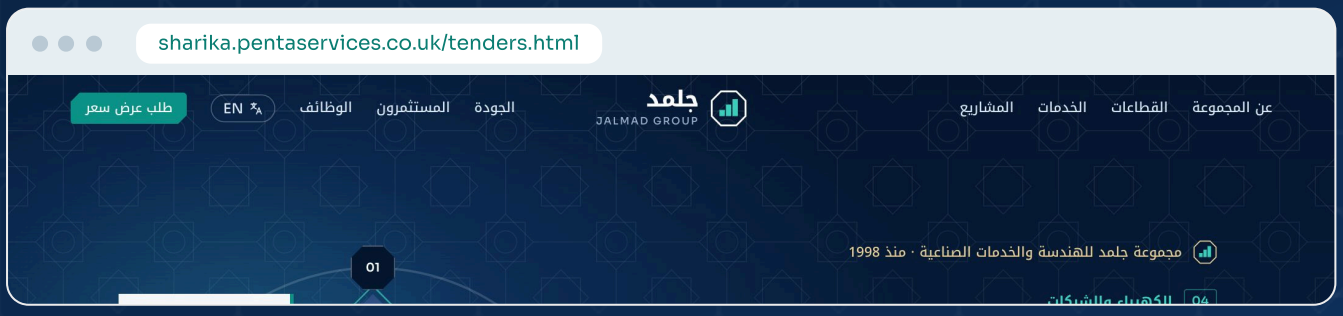

Ready Site price

Setup
£0 · US$0
Delivered faster than a custom build

Monthly
£34 · US$45
Hosting, SSL and business email included

Pay yearly
2 months free
10 × the monthly fee, plus a free domain

Ready Site prices for the Corporate Website package, November 2026. Prices in SAR, AED, EUR, PKR and other currencies on pentaservices.co.uk. 12-month minimum term from go-live.

What we need *and what we do*

What we need from you

- Logo and colours, if you have them (otherwise we design them)
- Company name in Arabic and English, CR and VAT numbers, addresses and phones
- Your sectors, services and the figures you are happy to publish
- Projects with city, sector, year and status, and two or three case studies
- Certificates, safety figures, leadership and board
- Photos of your sites and teams, and any existing company profile

What we do

- Adapt the design to your brand
- Load your content in Arabic and English
- Connect the RFQ, vendor, job and contact forms to your inboxes or CRM
- Generate your company profile PDFs
- SEO, structured data and Google Business Profile
- Test on phones, tablets and computers, then go live and look after it

TAILORED TO YOU

Every website is adapted to your company: your sectors, services, projects and procurement rules. Forms can send to email, a CRM or your ERP. We send a clear proposal with no obligation.

NEXT STEPS

Ready for a website that *gets you shortlisted?*

1. **See the demo**
   Open the demo on your phone and computer, in Arabic and English. Try the projects map, the profile builder, the RFQ and the vendor registration.

2. **Talk to us**
   Message us on WhatsApp or email: we show you the site and answer every question, with no obligation.

3. **Send us your details**
   Logo, company details, sectors, projects, certificates, leadership and photos.

4. **Approve and go live**
   You get a private preview link, approve it, and the site goes live on your domain.
